WORK EXPERIENCE

Technology Analyst

INFOSYS

2020 – Present

Designed and developed a set of micro-services using Spring Boot and Apache Camel as a replacement for web-services which was using legacy Integration platform (webMethods) and released it into production in cloud (AWS) thereby increasing the performance of the web service and implemented new features requested by the client (Bpost).

Working in an Agile team on user stories for adding new features in an full stack application that uses Angular for front end and Spring Boot for backend.

Associate

COGNIZANT TECHNOLOGY SOLUTIONS

2016 – 2020

Worked in the pilot team to reduce the interface related issues occurring in pilot applications in 3M and implementing enhancements requested by clients and on their major releases.

Worked as a developer and support analyst in IMES (Integrated Manufacturing Execution System) – A Java enterprise application built using Servlet framework used for core manufacturing process across 3M plants.

Worked as a developer to add new functionalities in IMES API – A Java REST API built using Spring MVC and Hibernate which enables external applications to connect, access and process information from a centralized database dedicated for manufacturing process.
